Océ® Low Solvent, Océ® Eco-Solvent Ultra, Mimaki® ES3, SS2, SS2-1, Hewlett-Packard® Eco-Sol, Roland® Eco-Sol Max, and Mutoh® Eco Solvent Ultra

Finishing Recommendations

This product can be grommeted for short-term indoor banner applications. Metal grommets should penetrate 2-4 layers of the material for added strength and durability. High tack banner tape can also be used for added reinforcement. Sewing this material can result in scratching or the removal of the coating. If sewing is needed, the material should be double stitched hem side up with a maximum of five (5) stitches per inch. Half moon wind slits are needed when banners exceed 10 feet. Corner reinforcements require a professional installer and proper installation tools.

Océ solvent and UV curable display graphics printing inkjet media supplies

Selected available roll sizes
